## Professional Summary

Computer Science undergraduate skilled in backend engineering using Python, Django, Flask, FastAPI, and JavaScript, with working knowledge of HTML, CSS, and Bootstrap. Experienced in building RESTful APIs and designing scalable backend systems. Strong foundation in data structures, algorithms, and debugging, with exposure to deployment, cloud environments, and DevOps fundamentals. Passionate about building efficient, reliable, and production-ready systems.

## Technical Skills

**Programming:** Python, HTML5, CSS3, JavaScript, Bootstrap, SQL

**Full Stack Development:** Django, Flask, FastAPI, REST APIs, Deployment

**Databases:** MySQL, DBMS

**AI Exposure:** GenAI Applications, LLM Integration, Prompt Engineering

**Cloud:** AWS Fundamentals, Cloud Architecture Basics

**Tools:** Git, GitHub, VS Code, Postman, n8n

**Core CS:** OOPS, Data Structures and Algorithms, Operating Systems, Computer Networks

## Experience

**Full Stack Development Intern - Ascentz Technologies (on-site)**

Jun 2025 – Jul 2025

- Developed backend services using Python and Flask to handle booking workflows and support concurrent user requests.
- Built and maintained 6+ RESTful APIs ensuring efficient communication between frontend and backend systems.
- Automated workflows using n8n, reducing manual effort and improving operational efficiency.
- Deployed backend services and ensured smooth execution in a cloud-based environment.
- Debugged and resolved backend issues, improving system reliability and performance.

## Projects

**FixItAll – Service Booking and Tracking Web Application**

*Python, Flask, SQL, REST APIs*

- Developed scalable backend system managing booking workflows and service lifecycle for multiple users.
- Designed and implemented REST APIs handling concurrent requests and real-time updates.
- Structured relational database to efficiently manage user data and service history.

**Forge Scheme – Government & Private Scheme Finder**

*Python, Django, SQL, REST APIs*

- Built backend logic to recommend schemes based on user input with optimized filtering algorithms.
- Improved data retrieval performance through efficient query handling and structured database design.

**EduClip – AI-Based Video Summarization and Learning Assistant**

*Python, FastAPI, GenAI, REST APIs*

- Developed AI-powered backend system for processing videos and generating concise summaries.
- Integrated GenAI APIs for Q&A and summarization, handling multiple inputs efficiently.

## Education

**B.E. Computer Science Engineering – 80%**

*SNS College of Technology*

2022 – 2026

*Tamil Nadu*

## Certifications

- Oracle Cloud Infrastructure AI Foundations
- AWS Cloud Practitioner Essentials
- Databricks GenAI Certification
- Salesforce AgenticAI Certification
- Generative Models for Developers – Infosys
- Python Programming Certification
